**SUDDEN CARDIAC ARREST** is the abrupt loss of heart function in a person who may or may not have diagnosed heart disease, each year. Sudden cardiac arrest strikes many people in worldwide - and without intervention, less than 1% of victims survive. It can effect people of all ages - any time and anywhere.

The Lifeline AED is a fully automatic defibrillator designed to analyze heart rhythm and automatically deliver a shock without intervention if needed.

The lifeline AED includes all mission critical features necessary to provide the most advanced treatment for Sudden Cardiac Arrest. Yet its so simple and unimimidating to use that even non-medical personnel can effectively save lives.

The device has recommended by American Heart Association.

The Lifeline AED defibrillator uses advanced biphasic technology including the most studied biphasic shock waveform and automatically adjust the shock delivery to the persons individual needs.

Lifeline AED has Certified of FDA, ERC & CE

Life-Saving Technology Within Reach

# A Simple Step That Saves Lives

While there's no way to predict or prevent sudden cardiac arrest, we do know that cardiopulmonary resuscitation (CPR) and defibrillation with an automatic external defibrillator (AED) within three minutes has shown to increase the chance of survival 70%. AED technology is so powerful that most CPR training courses now include a section on the use of these devices.

And yet, in a crisis, there's no time to read a training manual. Fortunately, the **Defibtech AED** is simple, clear and straight forward to use. The **Defibtech AED** is built to exacting medical standards - but it's designed to be fast and simple for anyone to use.

## The Defibtech AED :

- ♥ Provides step-by-step instructions that are loud and clear - even when there's a lot of ambient noise.
- ♥ Ranks as the top choice of many First Responders
- ♥ Has 5+ years of field-proven durability - including use in military settings.
- ♥ Features a brightly lit Active Status Indicator powered by a 9V battery, allowing the main battery to remain fully charged to save a life.
